WATCH AND FLAG PRESENTATION .-On Wednesday evening last a very interesting ceremony took place at Ren-West Virginia light artillery, met and presented a magnificent watch and gold chain to their late Lieutenant, James

The following presentation address was delivered by Dr. William Duval:

LIEUT. GORRELL: — In connection with many thousands of our fellow-citizens, we, the members of Battery H, have for the past three years been engaged as soldiers in minintaining the authority of our Government, the integrity of the Union, and in defending the Republic against the assaults of its enemies. was delivered by Dr. William Duval:

Transferred from another military organization, you came among us a stranger, with our prejudices against you. Yet you have mutually shared with us the dangers and privations of a soldier's life; and while faithfully discharging your duty as an officer, you have always manifested a kind and brotherly interest in the welfare of the Company. By your soldierly qualities and uniform kindness you have commanded our respect and won our esteem. And now on behalf of the members of Battery H, I present you this watch and chain, and ask your acceptance of it as a voluntary token of love and respect from your late companions in arms, and request hereafter when you look on its face you will remember the faces of your old comrades in Battery H, who were ever ready to fight with you the battles of our beloved country.

sensitive to the changes of temperature. In
thiscondition, the nose may be dry, or a slight
discharge, thin and norid, afterwards becoming thick and adhesive. As the discept becomes chronic, the discharges are increased in
quantity and changed in quality: they are now
thick and adheavy, and are hawked or coughed
off. The secretions are offensive, causing a had
breath; the voice is thick and masal, the eyes
are weak; the sense of the smell is lessened or
destroyed; dearness frequently takes place.
Another common and important symtom of
Catarria is that the person is chilised to clear
his throat in the morning of a thick or sliny
mucus, which has fallen down from the head
during the night. When this takes place the
person may be sure that his disease is the inperson may be sure that his disease is on its way to the lungs, and should lose no time in arresting it.
